

THE MARKET'S MOST COMPREHENSIVE PATENT SEARCHING SERVICE

We have an in-house team of patent research engineers working across all major industry sectors. They're backed by a world-class pool of attorneys and resources across 16 global offices. Which gives us the power, reach and flexibility to be your single point of contact for all your IP needs.

STRATEGIC SEARCHING AND SUPPORT

To help you achieve the maximum return on your IP investment, we'll develop a search strategy that supports your overall business and IP goals. So we'll be working to protect and maximize the value of your IP throughout its lifecycle, from creation and capture to securing, management and regeneration.

OUR TEAM

Our team of full-time, in-house patent research engineers covers a complete range of technical specialties and sectors. Our patent searching team is headed by Michael B Chernoff and John Wootress.

Michael is a Registered US Patent Attorney and is one of Intellectual Asset Magazine's IAM Strategy 300 world-leading IP strategists. In more than 22 years, he has served global organizations in-house and externally, and has been a Patent Examiner at the USPTO.

John has more than 16 years of experience in the IP field. He's worked at senior level with a number of global firms and corporations. John is a Registered US Patent Attorney and has extensive experience of managing IP search and analysis teams and projects.

OUR SEARCHING AND ANALYSIS SERVICES

You'll need a range of searching and analysis services as you progress through the IP lifecycle. Here's a quick summary of the services we provide. All are customizable to your needs.

SEARCHING

Patentability searching to determine the novelty of your invention prior to a patent application.

Validity and invalidity searching to find prior art that will confirm the validity or enforceability of your patent, or that will invalidate a third party patent.

Freedom to operate and infringement searching to clarify that your own product is free to use or to prove that a third party product is infringing yours.

Competitive technology landscaping to help you monitor trends in the technology relevant to your sector.

ANALYSIS

Detailed patent reviews to provide in-depth patent analysis according to your custom criteria.

Patent categorization to determine which patent classifications your idea will fall into.

Filing and grant trends to monitor patent application, enforcement and grant activity in your field or across a wider area.

Analysis of key inventors and companies to identify opportunities for collaboration as well as potential competition.

MULTI-SECTOR SEARCHING

Our attorneys and research engineers are experts in all industrial sectors, including:

HIGH-TECH AND SOFTWARE | LIFE SCIENCES | CHEMISTRY
PHARMACEUTICALS | ENGINEERING | ENERGY | CONSUMER GOODS
